Owner: Chief Executive Officer (CEO)

Approved by: Bach Singh

Version: 1.0 Effective date: 25/04/2026

Next Review date: 25/04/2027

Commitment to Achieving Net Zero

Eco Target Ltd is committed to achieving Net Zero greenhouse gas emissions across its operations by 2050.

As a business operating within the energy efficiency, retrofit, renewable energy and decarbonisation sectors, Eco Target recognises its responsibility to minimise the environmental impact of its operations and supply chain whilst supporting the UK's transition to a low-carbon economy.

This Carbon Reduction Plan has been prepared in accordance with PPN 06/21 and the associated Technical Standard for the Completion of Carbon Reduction Plans.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions.

Baseline Year

31 March 2026

As this is Eco Target Ltd's first Carbon Reduction Plan, the 2025/26 reporting period has been adopted as the baseline year.

Baseline and Current Emissions Reporting

Eco Target Ltd has adopted the financial year ending **31 March 2026** as its baseline reporting year. This is the company's first Carbon Reduction Plan and the first year in which emissions have been formally assessed.

The figures below have been prepared using available company information and reasonable estimates where full activity data is not yet available. Eco Target Ltd will improve the accuracy of emissions reporting during the next reporting cycle by obtaining actual utility consumption, mileage records, waste data and supplier carbon information.

Doc 110: Carbon Reduction Plan

Emissions Source	Scope	Estimated tCO ₂ e
Direct fuel combustion	Scope 1	0.00
Company vehicles	Scope 1	0.00
Purchased electricity, office and EV charging	Scope 2	4.50
Business travel, including estimated mileage	Scope 3	8.75
Employee commuting	Scope 3	11.20
Waste generated in operations	Scope 3	2.50
Purchased goods and services, including insulation, PV, batteries, ASHPs and construction materials	Scope 3	185.00
Transportation and distribution	Scope 3	18.00
Fuel and energy related activities	Scope 3	3.50
Total Estimated Emissions		233.45 tCO₂e

Eco Target Ltd operates three fully electric company vehicles and therefore reports zero direct tailpipe emissions from its company fleet. Associated electricity consumption has been included within Scope 2 where relevant.

As Eco Target Ltd purchases significant quantities of insulation, solar PV equipment, batteries, air source heat pumps and associated construction materials, purchased goods and services represent the most significant estimated emissions category. During the next reporting period, Eco Target Ltd will work with suppliers to obtain more accurate product and embodied carbon data.

Carbon Reduction Measures

Eco Target Ltd has already implemented a number of carbon reduction initiatives, including:

- Operation of a fully electric company vehicle fleet comprising three electric vehicles.
- Digitalisation of operational and compliance processes to reduce paper consumption.
- Remote and hybrid working arrangements where operationally appropriate.
- Electronic document management and customer communication systems.
- Delivery of retrofit, insulation, solar PV, battery storage and low-carbon heating measures which contribute to wider decarbonisation objectives.
- Procurement of energy efficient equipment and technologies where reasonably practicable.
- Reduction of unnecessary business travel through increased use of video conferencing and digital collaboration tools.

Future Carbon Reduction Initiatives

Over the next five years Eco Target Ltd intends to:

- Establish a fully measured carbon baseline across all operational activities.
- Monitor and report Scope 1, Scope 2 and relevant Scope 3 emissions annually.
- Continue transitioning operational activities towards low-carbon alternatives.
- Further reduce business travel emissions through route optimisation and digital engagement.
- Engage with suppliers to improve environmental performance and reduce embodied carbon within materials and products.
- Increase the use of recycled and responsibly sourced materials where appropriate.

Doc 110: Carbon Reduction Plan

- Review office energy consumption and identify opportunities for efficiency improvements.
- Implement carbon reduction objectives within procurement and supply chain management processes.
- Support staff awareness and engagement in carbon reduction initiatives.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

The information contained within this Carbon Reduction Plan is accurate to the best of Eco Target Ltd's knowledge and has been approved by the Board of Directors.

Signed on behalf of Eco Target Ltd:

Bach Singh

Director
